[57] **ABSTRACT**

A picture book including a switch unit mounted on part of the book. The switch unit is arranged in the style of an imitated telephone dial and is provided with a plurality of switching means. The picture book also provides a sound generator having a unit for generating false musical instrumental sound corresponding to activated switching means.

The picture book is further provided with at least one of two kinds of leaves, the one containing a picture to allow the switch unit to be part of a telephone and the other one containing a picture which makes up part of musical instrument.

5 Claims, 3 Drawing Sheets
